► Automation technology from Pilz

Total customer proximity

Pilz has a tradition as a family-run company stretching back over 60 years. Real proximity to customers is visible in all areas, instilling confidence through individual consultation, total flexibility and reliable service. Worldwide, round the clock, in 26 subsidiaries and branch offices.

Benefit-oriented innovations

Our customer proximity is the basis for our innovative strength. We are always oriented towards current market requirements, which is why we can offer innovative automation solutions in every case. Market leadership in safe automation secures our leadership in research and technology. Customer proximity and innovation belong together and are mutually dependent.

All our experience and knowledge go into individual products and sophisticated system solutions.

Overall solutions

Pilz is your solution supplier for all automation functions. Including standard control functions. Pilz developments protect man, machine and the environment. Our automation solutions incorporate our knowledge and experience from the stringent demands of safety technology, as well as the sum of our knowledge gained from over 60 years' experience of general automation technology.

the spirit of safety

With their knowledge, enthusiasm, creativity and courage to take the unconventional route, our staff have made us what we are today: one of the leading brands in automation technology.

More than 1 400 staff, each one of them an ambassador for safety, make sure that your company's most valuable asset – your staff – can work safely and free from injury.

Scan the QR code with your smartphone to find out more about Pilz.

Safe sensor technology PSEN®

Pilz sensors PSEN guarantee that machinery and complex plants can be used efficiently while still complying with standards intended to protect man and machine. The versatile portfolio means that solutions can be individually tailored to each requirement: from position monitoring to three-dimensional zone monitoring. We work on new, overall solutions and complete systems for your application. That way we continue to develop our own range – and adapt it to meet your requirements.

Pilz stands beside you as a competent partner in matters far beyond sensor technology. Because as well as safe control solutions, including in combination with sensor technology PSEN, we also offer classic standard products to a high level of quality. We also provide support through a wide range of services, helping you to realise your projects and implement them within your application.

control technology from Pilz

As market and technology leader, Pilz offers a universal portfolio of products and solutions suitable for cross-sector, international application. Whether you need safety or standard, machine or plant, a single product or a total solution: With Pilz you will definitely find a solution for your automation function.

Are you looking for a flexible solution? Used in conjunction with Pilz control technology, sensor technology PSEN provides a complete, economical and co-ordinated solution that's approved and safe.

In our example solutions, sensor technology PSEN is combined with:

- ▶ **PNOZ:** Safety relays for simple plant and machinery with up to three safety functions. Safe monitoring of E-STOPS, safety gates and light curtains/light grids, for example. The product range **PNOZsigma** combines minimum width from 12.5 mm with maximum functionality.
- ▶ **PNOZmulti Mini:** Compact, configurable safety relays, 45 mm width, with integrated display for simple diagnostics.
- ▶ **PNOZmulti:** Control system, configurable with the software PNOZmulti Configurator, designed for use from three safety functions.
- ▶ **PSS:** Programmable control system to monitor safety-related functions and/or for complete machine control. PSSuniversal is part of the Pilz decentralised periphery and offers solutions for standard and safety.
- ▶ **PSS 4000:** The automation system for standard and safety is the ideal system for automation solutions in all industries. Reduce engineering effort and costs, now.
- ▶ **Machinery safety services:** Pilz can provide professional support in all phases of the machine's lifecycle. From risk assessment and production of safety concepts through to implementation and validation. We can help guide you through CE certification and keep you fully informed on all the issues in seminars and training courses.

The safe, complete solution

In addition to the extensive sensor technology portfolio you'll find that Pilz also provides overall solutions in the area of control technology, drive technology, operator and visualisation systems, plus software. Enjoy the benefits of co-ordinated, automation solutions. That way you can save time and money in the implementation of individual components. The focus is always on the protection of man and machine, in compliance with the standards.

Pilz offers a wide range of safe sensors that conform to international standards and have been tested and approved by certification bodies. As the Pilz sensors were developed, great value was placed on performance, robustness, quality and easy of operation.

Free choice for your application

Safe sensors are suitable for use on covers, flaps, rolling doors, safety gates, cams, electrosensitive protective equipment and for position detection. In the overview you'll find the right sensors to suit your safety requirement. For example, if your safety gate needs a sensor with no guard locking function, with non-contact operation and the highest level of manipulation protection, PSENcode is the right choice.

Position monitoring

The right technology

The high variability of safe sensors PSEN can be seen in the different technologies: whether you need a mechanical, magnetic, RFID, optical or camera-based system – with its expertise and experience, Pilz has implemented every technology to its optimum.

Protection for your investment

Pilz sensors fit perfectly into your plant environment and also enable Pilz components to be retrofitted to your plant or machine. PSEN are also compatible with products and interfaces from other manufacturers.

► Versatile product portfolio – Safe sensor

The complete, one-stop solution that's safe and economical: Sensor and control technology from Pilz.

technology PSEN®

While high plant efficiency is a requirement in an industrial environment, it's important not to neglect the protection of man, machine and the environment: from commissioning to high availability during operation. Pilz sensors PSEN provide a safe, flexible solution:

High compatibility

Sensors from the various product ranges are compatible and can be connected in series. That reduces the inputs during installation, as well as saving time and costs during configuration and commissioning.

For any budget

As a ready-to-install system, potential engineering savings are not the only benefit on offer from safe sensors PSEN. Many sensors are equipped with different operating principles, enabling the solution to be geared towards your requirement.

Quality with safety

The product design has been developed individually for each PSEN product range, both technically and functionally; it's been attractively engineered, with a safe, sophisticated concept. Pilz is certified to EN ISO 9001 and our safety products have been developed for use in accordance with EN ISO 13849-1 and EN/IEC 62061.

Based on the different features and functionalities, our sensors can be divided into various product ranges. The graphic on this double page will help you choose. If you have specific requirements, we have the right products and solutions:

- ▶ Position monitoring devices – from page 10
- ▶ Safety switches – from page 16
- ▶ Safety gate systems – from page 36
- ▶ Optoelectronic protective devices – from page 46
- ▶ Safe camera systems – from page 66

► Safe proximity switch PSENini

IP67

PSEN in1p

Safe monitoring without actuators

The safe proximity switch PSENini detects the approach of metallic objects without the use of contacts. It supplies the necessary safe signals via positions and end limits. PSENini can also generate the pulse for counting tasks or for detecting rotational movements.

Applications for PSENini:

- Cams
- Rolling doors
- Pulse generator for counting tasks or rotational movements

High productivity and long service life

Compared with mechanical switches, PSENini provides the ideal prerequisites for high productivity and a long service life: non-contact, non-wearing operation plus high switching precision.

The safe proximity switch is also insensitive to vibration, dust and humidity.

High savings potential in series

Take advantage of the high savings potential of PSENini, even with the very highest safety requirements, because PSENini can also be connected in series with safety switches PSENcode and safety gate systems PSENSlock and PSENSgate.

Photo: KUKA Roboter GmbH

Type code for PSENini

PSEN in1p

Product area Pilz SENSors	Series	Connection type
Product range in – PSENini	1 Series 1	p Connector, M12, 8-pin (series connection integrated within sensor)
Operation Non-contact, inductive		n Connector, M12, 5-pin

Components for your safe solution	Order number
Sensor: PSEN in1p	545 000
Connection: PSEN cable, M12, 8-pin, 5 m	540 320
Evaluation device: PNOZ s3	751 103

The optimum solution: position of the turntable is monitored using the proximity switch PSENini and safety relay PNOZsigma.

Your benefits at a glance

- ▶ Investment protection:
can be combined directly with a wide range of evaluation devices
- ▶ User-friendly:
Rapid diagnostics via LED
- ▶ Economical and flexible:
series connection means less wiring and fewer inputs
- ▶ Highly versatile:
 - With strict hygiene regulations IP67
 - Heavy soiling
 - Insensitive to shock
- ▶ Long product service life due to wear-free function

Selection guide – Safe proximity switch PSENini

PSEN in1p

Type	Connection type	Series connection in combination with PSENini, PSENSlock, PSENcode ¹⁾	Order number
PSEN in1p	Connector, M12, 8-pin	▶ Y junction (cable separator) ▶ PDP67 F 4 code	545 000
PSEN in1n	Connector, M12, 5-pin	▶ PDP67 F 8DI ION	545 003

¹⁾ Up to PL e of EN ISO 13849-1, SIL CL 3 of EN/IEC 62061 and Cat. 4 of EN 954-1

Common features

- ▶ Typical operating distance (steel): 15 mm
- ▶ Diagnostic interface: 3 LEDs (status of actuator, status of inputs, supply voltage/error)
- ▶ Directions of actuation: 1
- ▶ Approach directions: 1
- ▶ Outputs: 2 safety outputs and 1 signal output
- ▶ Inputs (PSEN in1p): 2 safety inputs

► Safe rope pull switch PSENrope

IP67

PSEN rs1.0

PSEN rs2.0

Greater safety on the production line

Whether on the assembly line or machine – where safety in the production area is concerned, the safe rope pull switch PSENrope is a proven, reliable solution.

PSENrope switches off functional processes via manual operation in the case of danger. It offers maximum safety: the emergency stop function can be triggered at any point along the rope.

Optimum safety solution is as simple as that

PSENrope is flexible to use, easy to install and simple to operate. Whether it's a first-time installation or upgrade: the safe rope pull switch PSENrope simplifies installation with its sophisticated technical details.

Durable – even under extreme conditions

As the operating range of rope pull switches is limited only by the length of the rope, even large plants can be safeguarded using PSENrope.

Due to its rugged finish, PSENrope is reliable even under extreme environmental conditions.

Type code for PSENrope

PSEN rs1.0-300

Product area Pilz SENSors	Housing material	Contacts	Max. spring force to tension the rope
Product range rs – PSENrope	1 Al die cast 2 Plastic	0 2 NC, 2 NO	175 175 N 300 300 N
Operation Mechanical			

Your benefits at a glance

- ▶ High level of safety:
 - Manipulation-proof
 - Wiring space physically separate from mechanics
 - Dual function: E-STOP and pull-to-release in one
- ▶ Whether it's a first-time installation or upgrade: PSENrope simplify installation
- ▶ Suitable for indoor and outdoor use thanks to rugged, hard-wearing metal or plastic housing

Components for your safe solution	Order number
Sensor: PSEN rs2.0-175	570 303
Connection: Cable, depending on function, e.g. 8 x 0.5 mm ²	-
Evaluation device: PNOZ s4	751 104

The optimum solution: rapid emergency stop with rope pull switch PSENrope in conjunction with safety relay PNOZsigma.

★ Recommended type

Common features

- ▶ Suitable for applications up to:
 - PL e of EN ISO 13849-1
 - SIL CL 3 of EN/IEC 62061
 - Category 4 of EN 954-1
- ▶ Integrated E-STOP pushbutton
- ▶ Contacts: 2 NC, 2 NO
- ▶ Protection type: IP67
- ▶ Ambient temperature:
 - PSEN rs1.0: -30 ... +80 °C
 - PSEN rs2.0: -25 ... +70 °C
- ▶ Dimensions (H x W x D):
 - PSEN rs1.0: 237 x 90.0 x 88 mm
 - PSEN rs2.0: 294 x 42.5 x 88 mm

► Rotary encoder PSENenco

PSEN enc m1 eCAM

PSEN enc m2 eCAM

Safe position, safe speed

The rotary encoders PSENenco are used to determine position and speed. The rotary encoder available in the first expansion phase is an absolute encoder, which is used in the automation system PSS 4000. It supplies diverse, absolute position values, which are verified in the software block. The rotary encoder has a magnetic and an optical measuring system and thus combines two units in one.

Standard rotary encoder, but safe

The rotary encoder PSENenco is a standard encoder – but through the combination of the control system PSSuniversal PLC, the rotary encoder and software blocks, the system reaches SIL CL 3 and PL e.

Application of PSENenco

The rotary encoder PSENenco can be used in the mechanical press sector, for example. The Pilz “safe electronic rotary cam arrangement” solution completely replaces conventional mechanical rotary cam arrangements. Further application areas can be found anywhere that safe position detection is required.

Redundant, dual-channel rotary encoder.

Type code for PSENenco

PSEN enc m1 eCAM

Product area Pilz SENSors	Rotary en- coder feature	Series	Design
Product range enc – PSENenco	m Multi-turn	1 Series 1 2 Series 2	eCAM Electronic rotary cam arrangement
Operation Magnetic and optical			

Components for your safe solution	Order number
Sensor: PSEN enc m1 eCAM	544 021
Connection: Signal cable, min. 0.25 mm², shielded, stranded pair	-
Evaluation device: PSSu PLC1 FS SN SD	312 070

The optimum solution: rotary encoder, control system and software
= safe electronic rotary cam arrangement.

Your benefits at a glance

- ▶ Safe evaluation of speed and position
- ▶ The safe monitoring function is transferred to the user software
- ▶ High flexibility when monitoring limit values due to dynamic limit value monitoring in the user program
- ▶ Mechanical rotary cam arrangement is replaced by the safe electronic rotary cam arrangement PSS 4000 incl. PSEnenco

Selection guide – Rotary encoder PSEnenco

PSEN enc m1 eCAM

PSEN enc m2 eCAM

Type	Function	Rotary encoder feature	Order number
PSEN enc m1 eCAM	Absolute encoder	Multi-turn, hollow shaft	544 021
PSEN enc m2 eCAM	Absolute encoder	Multi-turn, solid shaft	544 022

Common features

- ▶ Two encoders in one housing
- ▶ Diverse, 2-channel (1 x optical, 1 x magnetic)
- ▶ 2 SSI interfaces
- ▶ SIL CL 3 and PL e within the automation system PSS 4000

► Safety switches

PSENmech

PSENmag

PSENcode

PSENbolt

PSENhinge

Safety switches – for safety gate and position monitoring at optimum cost

Pilz safety gate components are particularly economical in meeting the requirements of EN 1088. That's why they are used for applications in mechanical engineering as well as in the packaging or pharmaceutical industry and many other sectors.

Safety switches are available with various designs and operating principles and can even be used under difficult environmental conditions. Additional costs can be saved when connected in series.

Choose the optimum switch for your application:

- Mechanical – with safe guard locking, PSENmech provides personal and process protection
- Non-contact, magnetic – the magnetic operation of the PSENmag is ideal for applications with the highest safety requirements
- Non-contact, coded – PSENcode offers the highest level of safety and manipulation protection with integrated evaluation in the smallest space possible

Safety bolt – the robust, cost-effective solution for a rugged industrial environment

The safety bolt PSENbolt is particularly suitable for safety gates that are difficult to adjust or in areas where safety gates are often opened and closed. What you get is a complete solution comprising safety switch, handle and bolt.

Safe hinge switch – package includes hinge and safety switch

The combination of hinge and safety switch is the optimum solution for hinged safeguards. Designed as one functional and installation unit, the safe hinge switch PSENhinge offers a high level of flexibility in installation, connection and adjustment.

Selection guide – Safety switches, safety bolts and safe hinge switches

► Mechanical safety switch PSENmech

PSEN me1

Lock the safety gate securely

The mechanical safety switch PSENmech is suitable for safe monitoring of a movable guard.

PSENmech also uses increased extraction force on the actuator to prevent the safety gate from being opened unintentionally. The mechanical safety switch complies with the standard EN 1088 due to its coded actuators.

PSENmech ensures that the safety gate is interlocked (guard locking) until the hazardous production process is complete. This guarantees both personal and process protection.

Universal actuation directions provide flexibility during installation.

Type code for PSENmech

PSEN me1.2S/1AR

Product area Pilz SENSors	Product series	Series 1: Type of guard locking/ supply voltage	Series/actuator type

► Magnetic safety switch PSENmag

IP67

PSEN ma1.4a

PSEN ma1.4p

PSEN 1.2p

PSEN ma1.3a

Highest level of safety at a low price

Magnetic safety switches are used to monitor the position of guards in accordance with EN 60947-5-3 and also for general position monitoring.

PSENmag gives you a cost-optimised system comprising Pilz sensor and control system, including approval.

Maximum freedom for installation

The compact design of the PSENmag saves installation space. A large selection of connectors and cables plus an assured operating distance of 3 to 12 mm enable flexible assembly and rapid, simple installation.

High requirements – implemented economically

PSENmag switches can be used where a high category is specified, where there is heavy soiling or where strict hygiene regulations need to be met.

The rugged, fully encapsulated housing in conjunction with the non-contact, magnetic operating principle guarantees a long product service life.

Type code for PSENmag

Components for your safe solution	Order number
Sensor: PSEN ma1.3n-20/PSEN ma1.3-12	506238
Connection: PSS67 cable, M12, straight, socket/ M12, straight, connector, 5 m	380209
Decentralised periphery: PDP67 F 8DI ION	773600
Connection: PSEN cable, straight, M12, 5-pin	630311
Evaluation device: PNOZmulti	773100

The optimum solution: monitoring a cover using PSEnmag safety switch and the control system PNOZmulti.

Your benefits at a glance

- ▶ Safe complete solution with TÜV certification for the highest category applications
- ▶ Economical thanks to:
 - Space and time-saving installation
 - Long product service life as it is mechanically non-wearing
 - User-friendly diagnostics via an additional signal contact and LED
- ▶ Can be used with heavy soiling and strict hygiene regulations IP67/IP69K, ECOLAB tested
- ▶ High level of safety, even in potentially explosive areas

Manipulation protection

Installation of the sensor is concealed – as defined in accordance with EN 1088 – preventing manipulation. Other ways of manipulation are excluded if the actuator is secured using safety screws (one-way screws). If the greatest possible manipulation protection is required, we recommend PSENcode on account of the RFID technology and key lock principle.

► Coded safety switch PSENcode

PSEN cs4.1a

PSEN cs4.1p

PSEN cs1.1p

Highest level of manipulation protection in the smallest space

The non-contact, coded safety switch PSENcode is used to monitor the position of guards in accordance with EN 60947-5-3 and also for general position monitoring.

With PSENcode you have the smallest, coded safety switch with integrated evaluation and built-in manipulation protection thanks to RFID technology.

The unique fully coded version of PSENcode has the highest level of manipulation protection: the sensor will only accept a single actuator (key lock principle).

What's more, other ways of manipulation can be excluded if the actuator is secured using one-way safety screws – as recommended in EN 1088.

If the requirements for manipulation protection are less stringent, other versions of PSENcode are used. The coded PSENcode is accepted by other PSENcode actuators. The fully coded PSENcode only accepts one actuator. In contrast to the unique, fully coded safety switch, it's possible to teach-in a new actuator on the switch retrospectively.

Type code for PSENcode

Connection: PDP67 cable, M12, 8-pin, straight, connector, 30 m	380 704
Evaluation device: PNOZ s3	751 103

The optimum solution: monitoring swing gates using the safety switch PSENcode and safety relay PNOZsigma.

Simple implementation saves time and money

Save costs, from project configuration through to commissioning: Used in conjunction with Pilz control technology, PSENcode provides a complete, co-ordinated solution that's economical and safe.

Thanks to integrated evaluation and standard interfaces, PSENcode is open to products from other manufacturers. It fits perfectly into your environment and can be used to upgrade your plant.

High flexibility due to 5 actuation directions on the PSEN cs1.1.

Your benefits at a glance

- ▶ Highest level of safety and plant availability
- ▶ Highest level of manipulation protection in the smallest space
- ▶ Simple project configuration, as the unit is highly versatile:
 - Insensitive to shock and vibration
 - Can be used with heavy soiling and strict hygiene regulations IP67/IP69K
 - Flexible installation
- ▶ Economical:
 - Space-saving installation due to the compact housing
 - Highest level of safety, even when connected in series with PSENcode, PSENini, PSENSlock and PSENSgate

► Safety bolt PSENbolt

PSEN b1
(with PSEN me1S/1AS)

PSEN b3
(with PSEN cs4.1p)

For safety gates in a rugged industrial environment

Save the cost of expensive in-house engineering! In conjunction with Pilz safe control technology, the safety bolt PSENbolt offers you the safe, complete solution comprising safety switch, handle and bolt.

PSENbolt is particularly suitable for safety gates that are difficult to adjust or in areas where safety gates are often opened and closed; this is because a long material service life is guaranteed, as is protection against defeat and manipulation.

Longer service life for the integrated safety switch

The actuator is mechanically guided into the actuator head of the safety switch PSEN me1. This guarantees that the actuator is inserted correctly into the safety switch when the guard is closed. At the same time it provides mechanical protection for the switch.

Type code for PSENbolt

PSEN b4.1

Product area Pilz SENSors	Escape release/ locking pin	Can be combined with
Product range b – PSENbolt Operation Depends on the selected safety switch: ► Mechanical ► Magnetic ► Coded	1 Without escape release, without locking pin	► Mechanical safety switches PSENmech with guard locking (PSEN me1 series)

	2.1 With escape release, with locking pin, cannot be deactivated	
	3 Without escape release, without locking pin	► Non-contact, magnetic safety switches PSENmag (PSEN ma1.4 series)
	4 With escape release, with locking pin, can be deactivated	► Non-contact, coded safety switches PSENcode (PSEN cs3, PSEN cs4 series)
	4.1 With escape release, with locking pin, cannot be deactivated	

Components for your safe solution	Order number
Sensor: PSEN b4.1 combined with PSEN cs4.1n/PSEN cs4.1	540041 541103
Connection: PSEN cable, M12, 5-pin, 5 m	630311
Evaluation device: PNOZ s4	751104

The optimum solution: monitoring swing gates using the safety bolt PSEnbolt with PSENcode and safety relay PNOZsigma.

Your benefits at a glance

- Cost-optimised solution comprising safety switch, handle and bolt:
 - Save time and money in creating your own safety bolts
 - Reduce the effort involved in logistics and ordering
 - Compact design saves space
 - Long-lasting thanks to mechanical protection for safety switch
- High availability for your plant:
 - Highest protection against manipulation and defeat with safety switches PSENcode (RFID)
 - Locking pin protects the bolt from closing unintentionally
 - Escape release available as an option

▶ Safe hinge switch PSENhinge

PSEN hs1.1p

For guards

Safe hinge switches PSENhinge provide a safe, complete solution for guards, comprising hinge and safety switch. Enjoy the benefits of a safe, complete solution in conjunction with Pilz control technology.

PSENhinge is suitable for rotatable and hinged gates as well as flaps. Greater manipulation protection is achieved by concealing the installation within the guard.

Safe hinge switches from Pilz can also be used where there are strict hygiene regulations or heavy soiling, as they provide IP67 protection.

With re-adjustable switching point

Designed as one functional and installation unit, PSENhinge offer a high level of flexibility in installation, connection and adjustment. They allow systems to be attached to the right or left, for optimum cable feed at a switching point between 0° and 270°. Even after setting the switching point, the user can still correct the setting of the hinge with the integrated precision adjustment system.

Maximum flexibility

The change kit can be used to redefine the switching point when the plant is upgraded.

Connection: PSEN cable, M12, 4-pin, 5 m	630301
Evaluation device: PNOZ s3	751103

The optimum solution: monitoring swing gates safely using the hinge switches PSENhinge and safety relay PNOZsigma.

Selection guide – Safe hinge switch PSENhinge

PSEN hs1.1p

Type	Door stop	Order number ¹⁾
PSEN hs1.1p	Right	570270
PSEN hs1.2p	Left	570271

¹⁾ Order number for hinge and safety switch

Common features

- ▶ Hinge switches for monitoring the position of movable guards in accordance with EN 60947-5-3
- ▶ Can be used in applications up to PL e of EN ISO 13849-1, SIL CL 3 of EN/IEC 62061 and Cat. 4 of EN 954-1,

when two switches are used

- ▶ Connection type: Connector, M12, 4-pin
- ▶ Contacts: 2 NC
- ▶ Protection type: IP67
- ▶ Plastic-bodied design

Your benefits at a glance

- ▶ Safe, complete solution for rotatable/hinged guards, comprising hinge and safety switch
- ▶ In conjunction with Pilz control systems, can be used for applications with high safety requirements
- ▶ Manipulation-proof and space-saving, as it's integrated directly within the safeguard
- ▶ Highest flexibility in installation, connection and adjustment:
 - Switching point is free to set from 0° to 270° and is re-adjustable
 - Protection type IP67
- ▶ User-friendly:
 - Slot fastening for mounting on profiles
 - Simple re-adjustment by means of integrated precision adjustment system
 - Systems can be attached to right and left
- ▶ Low maintenance:
 - Rugged version for high mechanical loads
 - Resistant to soiling

PSEN sl-0.5p

PSEN sl-1.0p 1.1 VA

PSEN sg1c-2/1

PSEN sg1c-5/0

For guard protection

When a guard is opened, hazardous machine movements must be stopped in accordance with EN 1088 and a restart must be prevented.

It must not be possible to either defeat or manipulate the guards.

Pilz safety gate systems are particularly effective in meeting this requirement and incorporate additional functionalities for greater economy:

- PSENSlock – Safety gate monitoring with process guarding
- PSENSgate – Safety gate monitoring, safe guard locking and control elements

Application overview and distinction between safety gate systems

► Safety gate system PSENslock

PSEN sl-0.5p

PSEN sl-1.0p

PSEN sl-1.0p 1.1 VA

Safe position monitoring with process guarding in one system

The safety gate system PSENslock provides secure safety gate monitoring with a holding force of 500 N or 1 000 N (BG GS-ET 19) within one system.

With this combination of safe position monitoring and process guarding, PSENslock is designed for the highest category applications.

Stringent protection of man and machine

PSENslock is a safe alternative to existing mechanical technology. Highest possible manipulation protection and low wear and tear ensure a long service life and protect your investment.

Combined with Pilz control technology, you receive a safe, complete solution for guard monitoring.

Save time and costs during commissioning

Thanks to its different assembly directions, PSENslock can be installed and commissioned quickly and easily. It is optimised for mounting on the popular 45 mm profiles.

You can also save time and costs through series connection, even with the very highest safety requirements.

Type code for PSENslock

▶ Spring loaded terminals (1 set)	751 008

The optimum solution: guard locking on the flap using the safety gate system PSENSlock, evaluated using the safety relay PNOZmulti Mini.

Your benefits at a glance

- ▶ System optimised for safe position monitoring with process guarding
- ▶ High availability for your plant:
 - Suitable for the highest safety requirements
 - Highest level of manipulation protection (coding)
 - Process protection via magnetic guard locking
- ▶ Rapid commissioning:
 - Four assembly directions
 - Tolerant to gate misalignment
 - Flexible connection via connector
- ▶ User-friendly diagnostics via double-sided LED display
- ▶ Save power, as the magnet on PSENSlock is optimised for energy efficiency

► Safety gate system PSENsgate

PSEN sg1c-2/1 PSEN sg1c-5/0

The integrated system for safety gate monitoring

PSENsgate combines secure safety gate monitoring, safe guard locking and control elements in just one system. And that includes additional functions such as emergency stop and escape release.

Connected in series with other PSENsgate, PSENini, PSENcode and/or PSENSlock sensors, and in conjunction with Pilz control technology, what you get is a safe, complete solution to suit all categories.

Save time and components

You can benefit from a high savings potential: use just one ready-to-install system and all your safety functions and control elements are integrated.

With PSENsgate you save time and money during configuration, design, documentation, purchasing and installation.

So we can help you achieve an efficient time-to-market.

Type code for PSENsgate

PSEN sg1c-2/1 2.2

Sensor: PSEN sg1c-4/1	570 701
Connection: Cable, depending on function, e.g. 16 x 0.25 mm ²	-
Evaluation device: PNOZ mm0p ▶ Spring loaded terminals (1 set)	772 000 751 008

The optimum solution: monitoring a safety gate using the safety gate system PSENsgate and the safety relay PNOZmulti Mini.

Your benefits at a glance

- ▶ Reduced installation and wiring effort due to integrated control elements and the ability for series connection
- ▶ Highest category with just one switch per safety gate: for personal and plant protection up to PL e
- ▶ Suitable for 45 mm profiles
- ▶ Diagnostic LED enables fast reaction times to status changes
- ▶ Integrated emergency stop removes the need for an evaluation device and expansion modules
- ▶ Save power, PSENsgate is optimised for energy efficiency (gate locked max. 2 W)
- ▶ Safe, complete solution when combined with Pilz control technology

PSEN opSB-4F

For safe access to the production process

If the production process requires active intervention, there is a high potential risk. Mechanical guards can seriously disrupt the work cycle. Why not design workstations to be ergonomic and still provide effective protection for your staff.

PSENOpt offer greater productivity, while safeguarding access to the work process. Save costs:

- ▶ PSENOpt devices have a compact design and therefore save space
- ▶ They can quickly be incorporated, operated and maintained on your plant
- ▶ Protected fields and detection capability can be set up to be process-oriented

PSENOpt for all industries and applications

Muting, blanking and/or cascading open up a range of possibilities for optimum incorporation of PSENOpt into your plant. They are suitable for all industries and applications:

- ▶ Presses and punch machines
- ▶ Folding and cutting machines
- ▶ Machining centres
- ▶ Robot systems
- ▶ Assembly stations
- ▶ Assembly lines
- ▶ Transport and conveyor systems
- ▶ High-bay racking
- ▶ Packaging machines
- ▶ Injection moulding machines
- ▶ Wood, leather, ceramics and textile processing machines

PSENOpt – with semiconductor outputs

PSENOpt light beam devices, light curtains and light grids with semiconductor outputs are suitable for all type 2 and type 4 applications in accordance with EN/IEC 61496-1/-2. Read more from page 48.

PSENOpt SB – for SafetyBUS p applications

The safe, open bus system SafetyBUS p in conjunction with PSENOpt SB is recommended for cost-effective monitoring of a large light grid application. Only this way can you reduce the amount of work involved by using compatible system components. Read more from page 64.

Select the right PSENopt to conform to the standard

Carry out a safety assessment and evaluate the risk in accordance with EN/IEC 61496-1/-2. You can then use this information to work out the appropriate light curtain resolution for your application in accordance with EN 999.

Select the electrosensitive protective device that best meets your needs. This will mean greater safety for finger, hand and body, compatible with a wide range of applications.

PSEN op4F.../1

For finger, hand and body protection

Thanks to their compact dimensions, simple installation technology and optimum performance, PSENopt are an ideal solution when an ergonomic work environment is an absolute must. For example, where operator intervention is required as part of each cycle, such as insertion work, or the infeed and outfeed of material.

Muting to distinguish between a person and material

PSENopt devices with muting function are suitable for transporting material into and out of a danger zone, when loading or unloading pallets for example.

Muting with crossed muting sensors.

Components for your safe solution	Order number
Sensor: PSEN op4H-s-30-090/1	630 765
Connection: ▶ PSEN op cable, shielded, straight, M12, 4-pin, 5 m ▶ PSEN op cable, shielded, straight, M12, 8-pin, 5 m	630 304 630 314
Evaluation device: ▶ PNOZ s3 (for one light grid) ▶ PNOZ mm0p (for several light grids) - Spring loaded terminals (1 set)	751 103 772 000 751 008

The optimum solution: monitoring the infeed area on a press using the light grid PSENopt and safety relay PNOZsigma.

Cascading function for effective protection against encroachment into and behind the protected area

Adjacent protected fields can easily be safeguarded using the cascading function. Just connect master and slave quickly and simply using a convenient plug-in connector; also combines finger and hand protection.

Blanking for a flexible, uninterrupted production process

You can use the blanking function to blank out a defined area of the light grid. The safety function will not be triggered when the material to be processed passes through. Blanking can be implemented in two different ways: fixed blanking and floating blanking.

Floating blanking: Two beams are blanked out. Any object that obscures more than two beams will be detected.

Your benefits at a glance

- ▶ Economical:
 - Protected fields and detection capability can be set up to be process-oriented
 - Cost savings with PSENopt integration, operation and maintenance
- ▶ Functionalities which increase the efficiency and availability of your plant:
 - Muting to distinguish between a person and material
 - Cascading function for effective protection against encroachment into and behind the protected area
 - Blanking for a flexible, uninterrupted material flow
- ▶ Protects your investment: open for interfaces from other manufacturers
- ▶ Fast installation and commissioning thanks to a rotatable mounting bracket

► Selection guide – PSENopt

Hand protection: Type 4 – Light curtains PSEN op4H

Common features

- Compliant and approved in accordance with
 - EN/IEC 61508,
 - EN/IEC 61496-1/-2: Type 4
- For use in applications up to
 - PL e of EN ISO 13849-1
 - SIL CL 3 of EN/IEC 62061
 - Cat. 4 of EN 954-1
- Function selection:
 - Via DIP switch, manual/automatic restart
 - Feedback loop monitoring (EDM)
- Connection:
 - Receiver Rx: Connector, M12, 8-pin
 - Transmitter Tx: Connector, M12, 4-pin
- Safe semiconductor outputs: 2
- Operating range: 0.2 ... 19 m
- Supply voltage: 24 VDC
- Dimensions:
 - PSENop 4H-s-30-xxx/1: 32.3 x 36.9 mm
 - Other PSENop 4H: 35 x 40 mm

▶ Optoelectronic protective devices with S

SafetyBUS p
The Safe Standard

PSENopt SB

Simpler installation and fewer components

With the bus interface integrated within the PSENopt SB, there is no need for any other external components.

Rapid plant expansion

All the settings relating to the light grid are stored centrally on the control system and are activated via SafetyBUS p. For the “partial muting” function for example, the individual active zones or zone combinations can be set via the programmable control system PSS.

Diagnostics make all the difference!

The ability to diagnose fault conditions represents the key difference from a classic light curtain connection.

For extensive SafetyBUS p applications

With light curtains and light grids PSENopt SB you have a product that is perfectly compatible with the safe, open bus system SafetyBUS p.

Your benefits at a glance

- ▶ Less work during installation:
 - Reduced space requirement for light grid and installation
 - Hybrid cable (one-cable solution) up to IP67
 - Connection via SafetyBUS p connectors
 - Simple parameter setting with the programming software PSS WIN-PRO
- ▶ Reduced downtimes
 - Simpler troubleshooting thanks to extensive diagnostic data that can be evaluated directly from the controller
 - Units can be exchanged quickly due to centralised configuration and the ability to transfer all the settings

Additional functions relating to the PSENopt SB

- ▶ Internal light grid functions:
 - Muting (total/partial)
 - OSSD
 - Diagnostics
 - Reset (local and from PSS)
 - Test (local and from PSS)
- ▶ Additional periphery functions, connected directly to the light grid:
 - 2 x muting sensor
 - 1 x muting lamp, monitored

▶ Camera-based protection and measuring

Finger protection

Bending angle
is recorded

PSENvip RL D Set

Fast, simple original equipment and tool change

Precision adjustment on original equipment and after tool change can be made quickly and simply thanks to the innovative technology and software. This reduces setup times to a minimum.

In conjunction with descriptive information on the display, it guarantees productive work practices in complete safety. Time savings and intuitive handling make for happy operators.

Forming technology more efficient than ever

The PSENvip version with bending angle measurement records relevant control data from the bending process: the metal sheet is detected automatically and the bending angle is measured. Consistently high production quality and easy handling bring competitive advantages.

Safe press braking

The camera-based protection and measuring system PSENvip is a mobile protection system. It is used to monitor press brakes safely. When installed on the upper die, the system detects even the smallest foreign body in the protected field between the transmitter and receiver.

Innovative optical system for high productivity

An innovative optical system is used: the visible light beams are transmitted to the receiver via a telecentric lens (vision parallel). As a result, PSENvip

provides high availability and therefore better productivity compared to laser-based systems.

Highly robust thanks to resistant technology

PSENvip is insensitive to reflections and external/diffused light, as well as vibration and temperature stratification (e.g. due to heated tools). The longer service life of the light source reduces maintenance costs.

As the light is safe for eyes, PSENvip provides a higher level of safety than conventional systems.

Type code for PSENvip

PSENvip RL D M Set

Product area Pilz SENSors	Transmitter/ receiver	Display (receiver)	Design (receiver)	Scope of supply

Operation Non-contact, optical, 2D (area monitoring)				

system PSEnvip

Components for your safe solution	Order number
Sensor: PSEnvip RL D Set	583 000
Connection: ▶ PSEN op cable, shielded, straight, M12, 4-pin, 5 m	630 304
▶ PSEN op cable, shielded, straight, M12, 8-pin, 5 m	630 314
Evaluation device: PNOZ m2p	773 120
▶ Spring loaded terminals (1 set)	783 100

The optimum solution: safe, effective press braking with the camera-based protection and measuring system PSEnvip and the configurable control system PNOZmulti.

Your benefits at a glance

- ▶ Highest level of safety for press brakes in accordance with the most current safety standards and in accordance with prEN 12622
- ▶ Highly robust, resistant to vibration
- ▶ Higher level of operator safety:
 - LED light is safe for eyes
 - New, innovative evaluation of protected field
 - Detection zone certified up to 10 m
- ▶ Higher productivity and availability thanks to
 - Innovative optical system
 - Tolerance to vibration, temperature stratification, reflections, external/dif-fused light
- ▶ User-friendly:
 - Software-supported precision adjustment after tool change
 - User-friendly operation via integrated display

Foreign bodies in the optical field are detected immediately and the press operation is stopped.

Flexible application with integrated protection against reaching behind the system

The protected field enables flexible application in back gauge or box bending mode. One system protects the danger zone on the press from both front and behind.

And special purpose presses can also be equipped with PSEnvip, as the system is certified for detection zones up to 10 m.

Benefits at a glance
Camera-based protection and measuring system PSEnvip

► Productive version of PSEnvip plus PSS 4000

PSEnvip productive version in combination with the automation system PSS 4000.

Productive and safe

When the productive version of PSEnvip is used in combination with the automation system PSS 4000 in dynamic muting mode it is possible to increase productivity by up to 30 % compared with the base version. The control system PSSuniversal PLC performs two central tasks in this process: it monitors dynamic muting as well as the speed profile during the braking

process. The functions are available as blocks in the software platform PAS4000.

As a result, it's possible to approach the plate for longer at high speed during the bending process. So the time that the upper tool travels at reduced speed is reduced to a minimum.

Your benefits at a glance

- Increase productivity by up to 30 % through dynamic muting mode
 - Position of the plate is checked
 - Speed is monitored
 - Approach the plate at high speed for longer
- Flexible to adapt to the respective application thanks to the wide range of I/O modules available with the control system PSSuniversal PLC
- Innovative, productive system with compatible hardware and software with TÜV concept approval
- Plus all the benefits of PSEnvip (see page 67)

Bending process with productivity benefit.

▶ Safe camera system SafetyEYE®

PSEN se Starter Set 1

Three eyes are better than two

SafetyEYE is a "sight-based" safety technology for zone monitoring. It combines intelligent sensor technology with effective control.

The innovative 3D solution

The safe camera system SafetyEYE protects your plant from a bird's eye view, because the sensing device is installed above the zone to be monitored. Where today's applications require a multitude of sensors, a three-dimensional protective cocoon surrounds the danger zone or the object that is to be monitored. This guarantees free access to the work area and means that workstations can be designed with ergonomics in mind.

Barrier-free protection

SafetyEYE detects and reports objects that encroach into freely defined zones, known as warning zones and detection zones. With SafetyEYE, therefore, it is possible to determine whether there is anyone within the action radius of the hazardous movement (safety) or whether a zone with an increased safety level has been accessed (security).

Safeguarding the future – economical and flexible

Another benefit is that the zone being monitored by SafetyEYE can be divided virtually, into almost any number of warning and detection zones. Various actions can be assigned in the event of an object encroaching into these zones: for example, hazardous movements may be slowed down or brought to an emergency stop, acoustic/optical warning messages may be triggered or an alarm message issued to safety personnel.

Detection zones set up rapidly at the click of a mouse

Innovative 3D technology and user-friendly software enable even complex applications to be monitored and controlled with one system. Virtual warning and detection zones are set up intuitively using the SafetyEYE Configurator. You define the zones, combine them into groups or switch zone arrangements to suit your needs. This lowers your costs, reduces the number of components to a minimum and cuts expenditure on installation and engineering.

SafetyEYE enables man and machine to work together safely.

Leading technology: sensor and analysis unit combined with the programmable control system PSS.

Your benefits at a glance

- ▶ High level of safety and manipulation protection
- ▶ Economical:
 - Three-dimensional monitoring and control
 - Highly versatile
 - High level of flexibility when designing or redesigning applications
- ▶ High productivity:
 - Ergonomic workstations
 - Efficient work practices
 - Rapid installation and simple commissioning using just a few user-friendly components
 - Simple configuration of 3D warning and detection zones via software
 - User-friendly diagnostics, including evidence

► Decentralised modules PDP67

PDP67 F 8DI ION

PDP67 F 4 code

Decentralised and passive – decentralised safety

With the PDP67 modules you can achieve a high level of decentralisation. The digital input module monitors safety functions in the field and enables up to 64 sensors to be connected (PSEnmag, PSEncode, PSEnini, PSEnlock, PSEnmech and PSEnhinge).

The passive junction collects and forwards the signals and can be connected to up to four sensors (PSEncode, PSEnini and PSEnlock).

The ability to connect to various evaluation devices such as PNOZmulti, PNOZmulti Mini, PNOZsigma, or in future also the PSS 4000 control systems, enables a wide range of automation architectures.

Economical and safe

Incorporated into dirt and water-repellent IP67 housing, the PDP67 modules can be used even where there are high demands on hygiene. The decentralised modules optimise the installation and wiring effort by removing the need for additional, cost-intensive hardware, such as a control cabinet for example.

Type code for decentralised modules PDP67

PDP67 F 8DI ION HP

Product area	Design	Function	Number of inputs	Technology type	Type
Control technology					
Product range	67	F	8DI	ION	HP
Decentralised	To	Failsafe	8 digital inputs	I/Onet p	High
Periphery	protection		4 digital inputs	code PSEncode	Power
	type IP67				

The optimum solution: installed directly in the field with the decentralised modules PDP67.

Your benefits at a glance

- ▶ Simple installation means less planning, design and installation work
- ▶ Easy to implement a modular machine concept
- ▶ Just one cable for communication and supply, plug and play via M12 plug-in connector
- ▶ Simple diagnostics due to a point-to-point connection between the modules (each module can be identified)
- ▶ Individual sensors can be diagnosed on the modules

Selection guide – Modules for alternative connection options for sensors
